Miss Noble Grand,—Mrs. Sadie Austin Lew Emily Tolman, president of the Bradshaw Missionary Association, gave an especially gratifying report of money earned and expended for missionary purposes during the year, it being over four hundred dollars appropriated for home and foreign missions, besides having in the treasury a separate sum of one hundred dollars that is to be used for needed repairs on the vestry. Through its different mediums the church has given away over twelve hundred dollars during the past year. At this time the ratification of the appointment of Mr. Arthur E. this possible. When the fire was discovered Mr. Ryan rushed to the door of the barn and, throwing it open, succeeded in getting the dog out, but the smoke was so thick that he could not reach the horses. They were valued at about \$400 and were considered to be the best working horses hereabouts. The barn is valued at about \$600, but the value of the contents, aside from the horses, is not estimated. Mr. Ryan says his total loss is in the neighborhood of \$2000 and is insured.

=At the annual meeting of Boston Retail Grocers' Association, held recently, Mr. Walter K. Hutchinson was chosen vote (126) cast for that office. The re-tiring president said in his address referring to the period during which he had held the office:-

"These two years have been troublous times for the retail grocers. What with trading stamps, coupons, chain and department stores, with general cutting of prices, harder collections, materially reducing the profits, it would seem that it behooves us to get closer together in a neighborly union, compare notes, and take new courage for the future, and make our association what it was designed to be, a help to all."

=The annual meeting of the Orthodox Cong'l society occurred on Monday evening, in the church vestry, with Mr. Myron Taylor as moderator. Records of the year were read by Mr. P. B. Fiske, clerk. Report from the treasurer showed all bills paid and a balance in the treasury. The appropriations for the coming year were made and are the same as last year. Three new members were voted into the society and were Messrs. Arthur E. Rowse, William Gratto and F. B. Thompson. With the exception of the treasurer. Mr. Frank E. # WASHINGTON LETTER

(Special Correspondence.)

A greater number of persons ascended to the top of the Washington monument in the past year than in any previous year of its history. More than 145,000 have visited the great white staft of which number 110,968 were taken up in the big elevator, while 84,362 made the trip on foot.

Included in this number were persons from all nations on the earth. Sightseers from Europe, Asia, Africa and South America, as well as citizens of this country, were among them.

The largest number of sightseers in any one month was in March, when 24,573 tourists, attracted to the capital by the inauguration exercises, visited the monument. In January, owing to repairs being made on the elevator, there were but 2,293 passengers carried to the top. The average number of monthly visitors for the year was 12,105.

View From the Monument. No point of interest in Washington attracts more sightseers each year than the monument. From its windows at the top the visitor can get a perfect Telephone 303-4 Arlington. view of the topography of the surrounding country. To the west on clear days the vague outlines of the Blue Ridge mountains may be seen, while to the north a person with good eyes can see the faint silhouette of the Alleghanies. Sugar Loaf mountain and the peak near Harpers Ferry are the most easily discernible. Looking to the south one sees the historic Potomac, with its numerous windings, and, set in a plat of trees. Mount Vernon appears to be only a stone's throw away.

#### Beautifully Carved Stones.

Among the most interesting sights in the monument are the 172 memorial stones that are placed at the different landings in the interior. Besides the beautifully carved stones set there by the several states and territories and private organizations there are stones from many foreign nations, all suitably inscribed with the name of the donor.

The monument, though begun in 1848, was not thrown open to the public until in the fall of 1888. It measures from the base to the pinnacle 555 feet. At the base it is 55 feet square on the outside and 25 feet in the interior. The foundation is 38 feet deep and measures 126 feet square. The thickness of the walls tapers from 15 feet at the base to 18 inches at the pinnacle.

The face of the monument is made of Maryland marble. On the inside bluestone is used for the first 150 feet. the rest being granite. The total cost of the shaft was \$1,300,000.

# Unpleasant Ghosts From the Past.

Unpleasant ghosts of the dead and thought to be buried past are rising to confront certain residents of Washington, to the great glee of persons of democratic spirit who hate a "swelled An enterprising real estate man has discovered a directory of reprint it as a curiosity. This directory goes more deeply into details than such books do today. Not content with the statement that So-and-so is a cobbler and So-and-so a carpenter, it tells what every citizen owns and the style of his house. There are social leaders in Washington who have been active in keeping so called intruders out of the swim, and they are anguished at the thought this old directory proclaims their grandsires were blacksmiths or small liquor dealers. Some parents whose daughters have found husbands in high places are in woe at the impending revelations. On the other hand, folk who don't take the capital's "aristocracy" at its own valuation of itself are tekled at the prospect.

# Historical Documents.

A collection of historical American. documents, said to be one of the most extensive and interesting ever assembled, was recently on exhibition at the Congressional library. The collection was gathered for the benefit of the members of the American Historical association, which met the other afternoon in the library.

In the collection are documents that have furnished inspiration to many thousands of patriots. The earliest record of American history on view is the "Columbus Codex," a "grant" given by the sovereigns of Spain to Christopher Columbus in 1495. There are also Virginia records of the seventeenth century, and three cases are filled with the history of colonial times.

Time Clocks For Printers. Time clocks are to be placed in the government printing office. The new public printer, Mr. Stillings, has decided that there is too much absenteeism among the 2,000 employees of the big print shop and that it must cease. He asked Comptroller Tracewell if he had the authority to control the time of his employees by putting in the clocks, and the comptroller decided that he

could do so if he desired. By an act of congress the use of recording clocks is prohibited in all of the executive departments in Washington, and since Feb. 24, 1899, when this law was passed, no such system has been in existence in any of the branches of government service.

The comptroller says that the government printing office is not included in any "executive department" and that the act of congress prohibiting the purchase and use of recording clocks does

# Monument to Randolph.

Peyton Randolph, president of the first Continental congress, will have a government monument erected to his memory on the grounds of the William and Mary college at Williamsburg, the old capital of Virginia, if a bill introduced by Senator Martin is passed. Williamsburg is but a short distance from Jamestown, and the advocates of the bill hope to have congress act promptly and to have the monument finished by the time the Jamestown exposition is held in 1907.

RUNNING THE GANTLET.

This Punishment Was Face Used For Military Discipline.

The following extracts give information concerning the punishment of "running the gantlet:"

"In running the gantlope the regiment was formed six deep, and the ranks opened and faced inward. Each man being furnished with a switch, the offender, naked to the waist, was led through the ranks, preceded by a sergeant, the point of whose reversed halbert was presented to his breast to prevent his running too fast. As he thus passed through the ranks every soldier gave him a stroke."-Grose's "Military Antiquities," volume 2, page 108.

But the oldest notice I have seen is given in "Monro-His Expedition With the Worthy Scots Regiment (called Mackeyes Regiment), Levied In August, 1626, Etc. London. Printed by William Jones In Red-Crosse Streete.

"Other slight punishments we enjoyne for slight faults, put in execution by their camarades, as the loupegarthe (running the gantlet; Swedish gantulopp, to run through a hedge made by soldiers), when a souldier is stripped naked above the waste and is made to runne a furlong betwixt 200 souldiers ranged alike opposite to others, leaving a space in the midst for the souldier to runne through, where his camarades whip him with small rods ordained and cut for the purpose by the Gavilliger (provost marshal) and all to keepe good order and disci pline."-London Notes and Queries.

## WEDDING SPEECHES.

Some That Were Not In the Usual Conventional Style.

A wedding in New York at which the bridesmaids were representative of six nationalities and each felicitated the bride in the language of her own country was an odd affair, but probably not so well received as the speech of a young Englishman who was called upon to propose the toast, "The Brides-LIVERY STABLE. maids." Apprised of his ordeal in advance, he had devised an escape, and with the single statement that silence was golden he brought from his pocket a set of gold bangles, which he bestowed upon the attendants of the bride.

At a wedding feast at Dol, in Normandy, the demand for a speech resulted in the production of a guitar, upon which the speaker accompanied himself while he chanted the praises of the bride. Had he stopped there all would have been well, but he changed to a praise of his store, and the guests threw him out of the house.

age of the wall paper. Almost as odd day, 9.07, a. m, 4.36, p. m. was the performance of a German music hall performer, who, when called table upon his hands and balanced himnishings.

# Funny Blunders.

A famous sculpture group recently exhibited in Glasgow represents Adam and Eve after they had left Eden. Eve, in despair, lies at Adam's feet. Through a mistake an intelligent attendant placarded it with this description: "Motherless." At the same exhibition was a sleeping nymph, by a well known sculptor, which by another mistake appeared in the catalogue as "Mrs. -," greatly to the horror of Glasgow. # He Saw the Joke.

"One day." says an American, "I walked into a bookshop in the Strand and asked for Hare's 'Walks In London.' In America the book is sold in one thick volume. The clerk brought it in two. 'Oh,' I said as I looked at them, 'you part your "Hare" in the middle, do you?' 'I, sir?' he said, with a bewildered look. 'Oh, no, sir!' I saw he didn't see the joke, so I didn't explain, but bought the books and went away. A week later I went to the same shop. As soon as the clerk saw me he rushed from the back of the shop, laughing vociferously. 'Good!' he shouted. 'Capital! Part your "Hare" in the middle! That's capital, sir, capital!" "-London Tit-Bits.

The "Coming Out" Reception.

So many "coming out" receptions have been held in Washington and Baltimore lately that mothers of the more exclusive sets have about decided to abandon such affairs and will allow their girls to blossom forth without ceremony. The custom on the continent is for a mother to take her daughter to call on their friends and to leave cards. Then the girl will be invited to all suitable parties and is considered properly launched. This method is gaining favor everywhere. Instead of the "coming out" reception, which almost always has an uncomfortable crowd-and to which unbidden strangers often come-the wise parent waits until the girl knows her contemporaries, and then an enjoyable festivity can be given. In London debut parties are rare. In Paris and Berlin they are a thing of the past.

What Chicago Faces Tell. Chicago's great mission of uplifting the lower strata of races is broadly evident in the faces of its masses.

Of course only by viewing the multitude as a whole is the effect recognizable. The observer can know nothing of individuals; but, looking into the countenances of hundreds of Teutons, Jews, Celts, Scandinavians and Slavs, the prevailing types seen daily on the streets, he discerns the American quality in varying degrees creeping in to supplant some of the more marked native lineaments. A distinguishable homogeneousness is working out of the heterogene-

ous human compound. Even two or three years as janitor. teamster, gardener, junk dealer or hodcarrier in a large American city have an effect in molding away the aboriginal inertness and depression from the features of an alien.-Loren H. B. Knox

#### The Kaiser to Recruits. Recently the German emperor swore

in the recruits of the Potsdam garrison in a manner to inspire the soldiers with the spirit which swayed Cromwell's Ironsides. According to the Lokal Anzeiger of Berlin, he said: "You see before you an altar. On it behold the cross, the symbol of all Christians. As such you have taken the oath of allegiance to the colors, and I hope and require that you will ever be mindful of this pledge. As I stand here a memorable episode rises before my eyes. # Rents In a Crowded City.

Paris is about the only great city in the world where household rents are as much affected by overcrowding as in New York. Yet in the French capital 697,708 people hire apartments costing less than \$97.33 a year; 114.798 pay less than \$194.66 and more than \$97.33. Only 62,426 families live in apartments costing more than \$16.22 a month. Only

17,020 pay over \$778.64 a year. That is not very much like New York. Yet Paris was the birthplace of the "flat" idea. The first apartments built in New York upon the now familiar

Substitute For Celluloid. An Austrian chemist, Dr. Zirn, has invented a process whereby casein, the essential element of cheese and butter. may be solidified and shaped into the various articles that are now made of celluloid. It is said that this new product possesses many advantages over celluloid. It is not inflammable, so that the danger from fire sometimes encountered in the use of articles made of celluloid is entirely avoided. The new industry is now being developed at Surgeres, France, one of the great

Bread Question In Berlin. Restaurant keepers of Berlin are in the midst of a war with their guests as to whether "brodchen" shall be free with meals or be charged for in the bill. From time immemorial Berliners have eaten as many rolls as they desired, but the restaurateurs determined to put the bread into the reckoning. They hung up notices to that effect in their dining rooms, but their guests tore down the placards and refused to pay for their "brodchen."

To Insure World Peace.

The suggestion has been made that a triple alliance to insure the peace of the world should be formed by Great Britain, France and the United States. This should prove a most effective combination. It would bring into unison one-third of the population of the globe, with a fighting force of 4,700,000 men and 1.056 battleships. Japan would doubtless co-operate with the alliance. thus adding to its strength.-Leslie's

# THE CODE OF HONOR.

Dueling as It Was In France In the Time of Richelien.

The passion for dueling, which had cost France, it was said, between 7,000 and 8,000 lives during the twenty years of Henry IV.'s reign, was at its height when his son came to the throne. The council of Trent in 1545 had solemnly condemned the practice of single combat, impartially including principals, seconds and spectators "damnable custom of dueling introduced by the corruption of the century" to be the cause of so many piteous accidents, to the extreme regret and displeasure of the king and to the irreparable damage of the state, "that we should count ourselves unworthy and Modern I U to hold the scepter if we delayed to repress the enormity of this crime."

A whole series of edicts followed to the same effect, but it was easier to make edicts than to enforce them. Degradation, imprisonment, confiscation of property, loss of civil rights and death were the penalties attached to the infringement of the laws against dueling, and still the practice prevailed. In 1626 Richelieu published a milder form of prohibition. The first offense was no longer capital, a third only of the offender's property was to be confiscated, and the judges were permitted to recognize extenuating circumstances

A few months later the Comte de Bouteville thought fit to test the minister's patience in this direction. The Place Royale had long been a favorite dueling ground, and De Bouteville traveled from Brussels to fight his twenty-second duel here, in the heart of Paris, in deliberate defiance of the king's authority. The result was not encouraging. Montmorency though he was, the count went with his second to the scaffold, and the marked decrease from that time in the number of duels may be attributed either to Telephone connection. build a fine house for him, but was the moderation used in framing the law or to the inexorable resolution with which it was enforced.-Macmillan's Magazine.

### Dr. Holmes' Revenge. When "The Last Leaf" was publish-

ed by Oliver Wendell Holmes a critic attacked it savagely and cruelly. Dr. Holmes, though importuned by friends, did nothing in revenge. He waited for time to avenge him, which time did liberally. The critic fell upon evil days and ended his existence with suicide. The only morceau of personal revenge which the good doctor allowed himself was to cut out the paragraph about his enemy's career and paste it in his scrapbook on the same page which contained the original criticism and the announcements of the succes-

# Brazen Thefts.

During the South African war an immense stone monument was removed at Cape Town during the night, and no one knows to this day by whom or why it was taken. Some years ago, in broad daylight, a clever and bold gang of thieves carried off a valuable fountain fourteen feet high from Uxbridge without exciting the suspicions of any one and quite recently an omnibus was calmly removed, horses and all, while standing unguarded outside a public house in London and has never been seen or heard of since. It would seem, indeed, that it is often far easier to steal a big thing than a little one .-London Telegraph.

# A HISTORIC JOURNEY

CAESAR RODNEY'S GREAT HORSE-BACK RIDE IN 1776.

Low the Declaration of Independence Was Saved by a Vote In the Session of the Provisional Congress In Philadelphia.

It happened on that famous Fourth of July, 1776, the day on which the American colonies were declared free and independent states. If Caesar Rodney had not made his historic ride there might not have been any free America today.

The provisional congress was in session at Philadelphia, each of the thirteen colonies having representatives there. It was a great congress, and a momentous question was before the distinguished body. The great charter of our freedom had been written by Jefferson, and Benjamin Harrison, father and great-grandfather of presidents, had presented it to congress on Monday, July 1. What would the Continental congress do?

In order that our country should be free and independent the declaration must be adopted. This could be done if only the colonies were divided, and there were some good men who did not believe it best to take this step at this time. Four of the seven delegates of Pennslyvania were opposed to it, and, of the two Delaware delegates present. Thomas McKean was in favor of independence, but George Read was opposed to the measure. Caesar Rodney, the other member, was in the southern part of his state in the capacity of a brigadier general, organizing and drilling troops for the coming struggle,

Two of the opposing Pennsylvania delegates were persuaded to absent themselves, and thus the Keystone State would favor the declaration, but the vote of Caesar Rodney was necessary to carry the state of Delaware. A messenger was dispatched in hot haste to summon him to Philadelphia, and then for four days the "patriots of '76" talked and maneuvered to delay the final vote. On Thursday, July 4, congress was to vote on the momentous question.

On the afternoon of the 3d the messenger found Caesar Rodney in Sussex county, more than eighty miles from Philadelphia. General Rodney was at that time forty-six years old, with a tall, lean, worn figure, his face scarred by a cancer that was finally to cause his death. The brave patriot did not hesitate. "Saddle the black!" he commanded, and in ten minutes he had mounted his faithful steed and was galloping as if for life to the northward.

Eighty miles away from congress. which was waiting for him to declare the independence of the colonies. The thought caused him to drive his spurs deep into his horse's flanks and sent him flying along the long, dusty highway that stretched away toward the Quaker City. It was one of the great rides of history. That black steed bore the destinies of America, and his rider knew it, and there was neither halt nor delay.

The sun went down, and the stars came out one by one in the blue vault of heaven, and that solitary rider rushed on his way. All through the cool summer night Caesar Rodney kept up his reckless pace.

The stars faded out of the morning sky, and the sun came up red and fiery, the herald of a sultry day. And still Caesar Rodney kept on his way. He was yet many miles from Philadelphia. His horse was jaded, and he was travel worn and covered with dust, but the patriot did not slacken his rein. He must be there to vote for the independence of America. And he was there. All that hot, sweltering July day the delegates of the colonial congress were talking and voting in Independence hall. The session had begun. The president, John Hancock, was in the chair, and the clerk, John Dickinson, was calling the colonies one by one. Virginia had voted and Massachusetts and the great state of New York and the little state of Rhode Island, and now New Jersey was voting, and Caesar

Rodney had not come. Anxious and worried, Thomas Mc-Kean went out to the door of Independence hall. Would his friend and compatriot be too late? His face brightened as he heard the sound of hurrying hoof beats coming up Chestnut street. A foaming, panting steed dashed into the yard. Its dusty rider leaped to the ground. Booted and spurred and the dust of his long ride thick on his long flapped coat and iron gray hair, Caesar Rodney entered the hall of congress leaning on his friend Mc-Kean's arm.

He was just in time. The vote of Delaware was being called. George Read voted "Nay." "Aye!" called the clear voice of Thomas McKean. It was n tie. All eyes turned to Caesar Rodney. The famous rider cleared his throat, and many a patriot heart beat with pride as he declared in firm tone: "The voice of my constituents and of all sensible and honest men. I believe, is in favor of independence, and my own judgment concurs with them; therefore I vote for the Declaration."

And so Caesar Rodney by his famous ride and by his noble vote helped to settle the question of independence and insured the future celebrations of the Fourth of July.

# He In the Long Ago

By VIRGINIA LEILA WENTS

Grown weary of his reading, Kent Harding glanced across the deck. There a slender, girlish figure leaning idly over the rails caught his attention. Although the veil of her yachting cap was down and it was possible to distinguish only the vague outline of her profile, something in the graceful poise of her head, in the tip of the shell-like ear and in the lustrous brown hair that gleamed in the red shine of the setting sun made him think of a girl whom he had known in the long ago. "By Jove! I wonder if it could be,"

he speculated, looking at her sharply and blinking through the smoke from Just then she raised her veil and turned. Harding saw that she was, in fact, the selfsame girl. She knew him instantly as he came forward, and they

shook hands heartily, as became old

friends. "Of course, when we get back to New York, you'll come and see me," continued Vittoria after they had talked of many things. "You know, when brother married, I issued my declaration of independence. It's a dear little box of a house in Greenwich village. All alone? Why, to be sure. That's the principle upon which I made my stand-a woman against the world." She smiled as she spoke, and her teeth

glistened prettily in two little rows. "Sounds more terrifying than it really is," she went on without giving him a chance to throw in, "for the bachelor maid has only to acknowledge to thirty and the world tosses up the sponge at once. It doesn't care to continue a

fight after it's ceased to be interesting." But Harding had put his beloved pipe in one corner of his mouth and was going through an elaborate pantomime of counting on his fingers. "Nine and

little silence fell. "Nine years," observed Harding suddenly. He had been stretched out lazily in his chair, his hands beneath his curly head, his gray eyes staring straight into the glory of the western heavens. "It's a good slice, isn't it, if

one hasn't accomplished"-In the midst of his sentence he saw Vittoria nod to some one. Following the direction of her eyes, he perceived a tall, blond girl, smartly gowned and of rather haughty demeanor, walking briskly toward them. A maid followed more slowly with a steamer rug and an

armful of wraps. "Ah, it's Marion," he exclaimed half to himself. And to Vittoria, "Do you

know her?" "Our acquaintance is only a bowing one," volunteered Vittoria coldly. "I met her last month in Switzerland."

"Hello, Kent," cried Miss Marion Lane carelessly, as he rose to greet her. From beneath her inky lashes she glanced at Vittoria indifferently and nodded slightly again. "You can join mother and me when you like-no hurry," she murmured amiably as she swept on down the deck, where her maid deposited her rug and wraps beside an alert looking little widow in

"I'm engaged to Miss Lane," Harding said oddly at length. "At least, I've

asked her to marry me." "You"- began Vittoria incredulously. Then a change took place in her feminine mind. "And her answer?"

"She's considering it. In the mean-

time, of course, it's a secret." "Of course." "I love her," said he, a bit shamefacedly. "It must seem strange that I -to say this-to you"- he stammered. "No, I think I understand," she said quietly. And then she listened with in-

credible patience to his foolish rhap-

sodies. There never was such an ador-

able creature as Marion-such wealth of tenderness and undiscovered charm. Shortly afterward Harding took his leave. The twilight was fast coming on, and Vittoria sat for a long time leaning over the rail again. She was

looking into the long ago. Now there was once a girl, and she was barely seventeen-oh, sentimental, to be sure! And he was a nice boy home from college on his senior vacation. She had cared for him, for he was a nice boy and had such manly, honest gray eyes. And then one summer day as they had stood alone in the old fashioned garden he had kissed her. Ah, how unforgettably vivid was the background-the gold of the sunflowers and the crimson of the hollyhocks!

And the next day they had walked over to the village, where he got her a foolish little ring set with blue stones. "because blue means true love," said he. Just a boy and girl affair. And the next week the boy had been whisked off on a continental tour and had contemplated the University Settlement. Finally, however, he had compromised with parental authority by going in strenuously for football. Football as a specific for lovesick-

ness! Vittoria laughed softly at the remembrance. But it had cured him. When three years later they had met again she saw that the episode with the sunflower and hollyhock background was already too remote to occasion even momentary embarrassment. The knowledge that he'd forgotten had hurt a little. Yes, if one must be honest, nine years ago it really had hurt a good deal!

stateroom Vittoria drew out that foolish little ring from its secret hiding place and cried a bit over it. She wasn't so very far removed from the girl of seventeen after all.

Five weeks had gone by and Kent Harding was still waiting for his answer from the unfathomable Miss Lane. In the meantime Vittoria's little \*box of a home" in Greenwich village had seen a good deal of him, for Vittoria had proved herself such a stanch and sincere little friend that he had elected to make her the confidant of his passion for another woman. Five weeks, and then gradually she had perceived a curious silence on Harding's part-a constant inclination, when Miss Lane was alluded to, to change the topic of conversation.

One night Vittoria had given a small dinner party. Harding, being privileged for the sake of old times, had outstayed the other guests. He seemed a bit abstracted, and it was a long time before he could get his cigar to draw properly. The silence somehow to Vittoria took on a terrifying tension. She strove for some light thing to say. Suddenly Harding looked up from his

night. It was cold, bleak, biting weather, and the old fellow hobbled up and down the platform, but there was majesty even in his very hobble. An undertaker's wagon pulled up at the station and a corpse was removed from it. The baggageman carelessly hustled the body into his dray and wheeled it down the platform. As he halted, old Forrest broke out into the most horrible cursing, and with his tongue lashed the baggageman for his careless handling of the human clay. Then he turned, approached the corpse and broke into the oration of Mark Antony over the body of Caesar. No one was there but the frightened baggageman and a handful of actors. The great actor's voice rose and fell and the subtle tears and resolute thunder of the oration awoke the echoes of the station as a grand organ in a majestic cathedral. He read every line of the oration and said in an aside speech as a climax: "There, take that, you poor clay in the coffin. I'll be dead myself inside a

### Rev. Mr. Gill on Unitarianism.

The monthly evening service at the First Parish (Unitarian) church, Arlington, on Sunday, was, in spite of the storm, attended by a fair congregation. With Mr. E. S. Bernhardt's Farewell.

At Boston Theatre, Mune. Sarah Bernhardt, the foremost actress of this or any other generation, is passing in review. Her engagement is for two weeks only, and the first half is nearly over. Such triumphs of histrionic art on the part of this world renowned tragedienne, such enthusiasm has never been witnessed in Boston. Beginning with "La Sorciere," Sardou's melodramatic masterpiece, Mme. Bernhardt followed on Tuesday evening with "Camille," and then a different bill for every succeeding performance, her repertoire for the first week including also "Adrienne Lecouvreur," her own crearepertoire for the first week including also "Adrienue Lecouvreur," her own creation. Alphonse Daudet's "Sapho," for Thursday evening; "Fedora," Friday; Racine's famous poetic tragedy "Phedre" for Saturday afternoon, and "La Femme de Claude" for Saturday evening. There are two new bills in Mme. Bernhardt's repertoire for her second and final week—"Magda," which she offers on Tuesday evening, and "La Tosca," for Wednesday evening. On Monday night she will repeat "Adrienne Lecouvreur," giving "Camille" for the Wednesday matinee; is chusetts, and bounded and described as follo vs.—Beginning at the southeasterly corner of the premises on Granite Street, at a stake at the corner of premises on Granite Street, at a stake at the corner of premises of the late N. # Circus vs. Cookery

By COLIN S. COLLINS

Copyright, 1905, by J. W. Muller

Jackson Peters regarded the girl by his side almost with horror.

"I can't help what you think," she cried defiantly. "I just can't stand this sort of thing any longer."

"You don't have to," he urged gently. "You just say the word, Sally, and I'll

see your pa tomorrow."

"Can't you understand, Jack Peters?" she cried, with a stamp of the foot, "That woman wouldn't let me take the high school course 'cause I'd be wantin' to go to college next, she said. She just don't want to see me do anything grand; just get married and settle down slaving for some man just as I've been slaving for her ever since pa married her."

"Don't you think," he suggested gently, "that perhaps she means well? She's seen a lot of the world. Mebbe she knows 'twouldn't do no good."

"There you go, preaching like all the rest," she stormed. "Some of these days you'll wake up and find me gone. I can be as good as her."

"I don't see why you want to go off and be foolish jest because you don't like Mrs. Burrows," he declared gently. "She means well."

"I'm going to be like her," insisted the girl, pointing to a lurid poster representing a young woman in gay apparel standing upon the tip of her toe on the back of a spirited horse. "She was one of 'em once. I guess I can ride that way as well as on a saddle."

Sally Burrows got down from the wall. "All the same," she cried defiantly, "I'm goin' with 'em," with a nod out of the tent humiliated and ashamtoward the circus posters. "I guess I can cook for 'em until I can ride."

She darted off down the road. Peters looked regretfully after her. He knew from experience the futility of seeking home. to overtake her.

Things had been well between himself and Saily Burrows until her father had married a circus rider who had used to ride for Wells and that we had been thrown from her horse and left it fixed up for her." behind by the show until her fractured leg grew well.

Long before that time she had won the affections of Hiram Burrows, and she made him a good wife. home and make a name for herself even as the rival had done, and Jackson Peters pleaded in vain.

He had a strong ally in Mrs. Burrows, who saw that the girl in a home of her own would be far happier than in her father's house, but this very alliance was against him, and Sally from the barn saw him go into the house, and her slender frame shook with sobs as she realized that Jack was talking over her new idea with her stepmother.

She did not, however, connect Jackson's visit with his departure for the county town the following day, nor did she realize that he carried with him a letter to the proprietor of Wells' Grand United Shows and Consolidated Menageries; therefore it was with no suspicion that she regarded that gentleman's enthusiastic welcome of her proposition that she join the troupe and act as cook until she could learn to be a performer.

"Just what I wanted," he cried jovially. You've got the very build for a rider. We lay over here tomorrow, vaguely termed "the Australian governand I'll give you your first lesson in the ment." As a matter of fact, it is about afternoon.'

Sally wanted to wait, but Wells would take no denial. The show would neighboring continent, is an independstay on the grounds over Sunday, and there was no time to be lost. She could slip away from her people, and ery than any other single country of he could tell just what she could do.

Wells was teaching his own daughter to ride, and to the center pole of the a cold climate. A man in his undershirt and overalls, looking very little like the ring master of the afternoon before, stood talking with the tired faced clown. As she appeared he came toward her with a broad canvas belt.

This they fastened about her waist, hooking the ring at the back into the dangling rope. The ring master lifted her to the horse's back, while the clown pulled the rope tight, and with a few brief directions about keeping her balance the ring master cracked the whip received for his frescoes in the palace and the horse started off.

For two or three paces she kept her balance, then, with a yell, she realized that she was falling. Her feet went up and the weight of her body was thrown against the belt.

They let her down, gasping for breath, until she clutched the horse's mane and one talent, or \$1,200 a year. Apelles recould regain her footing. Twice around the ring and her ambition to be a rider died within her. She scrambled from the horse's back, trying to choke back the tears of humiliation.

Wells was all sympathy. "Perhaps you might be better as an acrobat," he suggested kindly. "You'd make a good enough rider if you kept at it. Dolly, here, was "orse than you when she started in. Want to try it again?"

"I think I'd rather be an acrobat," she almost whispered, trying to choke back the sobs. Acrobats were not left dangling over a horse, and they had a soft mat to fall upon.

The clown led the horse from the ring, and two men unrolled a felt pad upon the sawdust. Even without the blue tights she recognized them as the acrobats, and she watched them curiously as they fastened a rope about the

The eleventh series consists of combinations of the foregoing varieties, and the twelfth comprises all animal perfumes of whatever nature.

# Ancient Artists.

Is it known generally that works of art were well paid for in ancient times? A German review furnished recently some particulars about that question. Polygnote of Thasos, who lived about 450 B. C., refused, it is true, any payment for his works and declared that he was sufficiently rewarded with the title of citizen of Athens, which hadbeen conferred on him. But such disinterestedness was seldom imitated. Thirty years later the painter Zeuxis of Heracleum was called to the court of Archelaus I., king of Macedonia. He of Pella 400 mines, about \$8,000. Mnason of Elathea paid \$20,000 for a "Battle With the Persians," which he had ordered from Aristides, the leader of the Theban school. Pamphilus of Sycione gave a course of lectures on painting. Each pupil paid for attendance

Empire Styles.

There is no doubt about it that all the important fashions of the moment may be more or less designated empire. From the most beautiful sable cloak to the simplest girlish tea gown this beautiful period of historical fashion leaves its indelible impression. The most elegant type of figure certainly looks well in these beautiful old world garments. more especially when they are brought up to date by the many devices unknown to the times which gave them birth.

New Monograms.

There are indications of a change in the fashion of monograms for something decidedly larger than those we have been using for the past year or so. Some new styles are fully twice as large as the largest of last year, going up and down instead of being square. Moreover, they were placed well to the left of the note sheets and dinner cards on which they figured.

### The Legend From Which Was Born the Story of Faust.

Almost every renowned man of antiquity in the middle ages was believed to be attended by a spiritus familiaris and not a few were suspected of being in direct league with the devil. Probably the oldest legend of which the Faust legend is a continuous thread is that of Simon Magus, mentioned in the history of the apostles.

According to Justin, he was a native of Gitton, a village in Samaria. He was, no doubt, a man of great intellectual powers. He was the father of the school of the Gnostics. It is also reported of him that he could make himself invisible, that he could pass through flames unharmed, could transpose matter, make gold and exorcise demons-in fact, he laid claim to all these powers, and his name lived in the mouths of the people as a sort of demiurge through many centuries until some other miracle working personality took his place at the popular fireside. Unusual accomplishments, great erudition, were attributed to the supernatural influence and the general disposition to superstitious assumption was strengthened on the one hand by dogmatic affirmation on the part of the church of the existence of a personal Satan, with his numerous household, and, on the other hand, by incorporating the magic arts among the practical sciences, of which astrology and alchemy occupied no mean part.

# THE ODD LITTLE GECKO.

### A Queer Animal That Lives In Africa and Southern Europe.

The gecko is an odd little creature. His name is seldom heard, and his form is seldom seen, for he lives in Africa and the southern countries of Europe.

This little gecko has so many strange ways and there is something so uncanny in his appearance that the people of the countries where he lives are rather afraid of him, believing his bite to be poisonous, although this is denied by naturalists.

He is a little creature, with a broad, flat-head, like a snake, and a long body, with a narrow tail, with odd shaped bits of skin arranged like scallops along the sides of it. He has short legs and queer, catlike claws, which enable him to easily climb the old walls and rocks upon which he lives, catching the insects of various sorts which make his dinner.

He is a nocturnal animal, walking abroad at night and sleeping in the daytime. He moves with sudden rushes and without any noise whatever. His odd name was given him from the queer noise he makes, which is something like the noise you would Harland in Lippincott's. make to start a horse with. The male gecko is of a gray color, so near the shade of the old walls and rocks among which he makes his home that He Is More Dangerous Than the One he can barely be seen.

# Chinese Children.

The education of their children is a matter of no small interest to the affectionate Chinese mothers. They watch the little one from the day he is born, to note superstitious signs. Let him cry lustily, and he will live long, say the old grannies. If he teeths or lovable in disposition. At first the little Chinese are not very attractive objects, presenting rather a scaly appearance, due to the custom of not washing them lest they catch cold. A month after his birth the boy's head is shaved. A great feast is prepared and celebratname." When he enters school his name is changed, as it is once more when he receives his degree.—Pilgrim.

# A Curious Legend.

An ingenious old writer says that the name originated as follows: "In Deadstanding open for more dead Commodities, at foure of the clocke in the same evening he was got up alive againe by a strange miracle, which, to be true and certaine, hundreds of people can testifie that sawe him acte like a country Ghoste in his white peackled sheete." However, a more exact historian explained that the name was

### BIRD JOURNEYS.

#### Small Animals Often Travel on the Backs of Large Ones.

It has often been asked how small and weak birds manage to fly such enormous distances when migrating. As a rule, however, small birds that have come very far across the sea have not flown, but have been blown over during violent gales, and many of them arrive on land in a half dead condition.

In fair weather small birds make long journeys successfully over considerable tracts of ocean, but the reason is that they are carried on the backs of the larger ones. When passing an autumn in Crete a writer asserts that he distinctly heard the twittering of small birds when flocks of sand cranes were passing overhead on their way to southern shores. On another occasion, when firing a gun, he saw three small birds rise from the flock and disappear again among the cranes. A native priest assured him that they came over from Europe with them, while it has been found that small birds, never before seen in certain parts, have been brought thither at times of migration.

Another cause is that small birds do not make their journeys in one flight. They generally rest during the day, searching for food, and thus proceed to their destination by easy stages.

# THE PEARL WORKERS.

#### A Bethlehem Industry Which Is Five Hundred Years Old.

The chief industry of Bethlehem of Judaea is that of the mother-of-pearl

The shells are brought from the Red sea and in the hands of native artisans are polished and carved, the larger into elaborate designs. The smaller are cut up for rosaries and crosses. The work is all done by hand, and the methods are amazingly primitive to a spectator from the home of steam and electric power. But the results are extraordinary. The largest shell we saw was carved in scenes from the birth of Christ, the agony in the garden and the crucifixion, and had the general effect of delicate frostwork. Under the magnifying glass every detail was seen to be perfect in outline and in finish. It was exucuted to order for a wealthy American and was to cost \$160.

About 150 people make a living by this industry, which is 500 years old. In the shops the workmen sit upon the floor, their benches in front of them. The air is full of whitish dust, and the light admitted by the single window and the open door is so dim that the exquisite tracery of the wrought shells is a mystery even before the visitor notes how few, simple and crude are the instruments employed - Marion

# THE CALM BAD MAN.

Who Blusters.

The bad man of genuine sort rarely looked the part assigned to him in the popular imagination. The long haired blusterer, adorned with a dialect that never was spoken, serves very well in eastern fiction about the west, but that is not the real thing. The most dangerous man was apt to be quiet and smooth spoken. When an antagonist walks too soon he will grow up un- blustered and threatened, the most dangerous bad man only felt rising in his own soul, keen and stern, that strange exultation which often comes with combat for the man naturally brave. A western officer of established reputation once said to me while speaking of a personal difficulty into which ed, the child now receiving his "milk he had been forced: "I hadn't been in anything of that sort for years, and I wished I was out of it. Then I said to myself, 'Is it true that you are getting old and have lost your nerve?' Then all at once the old feeling came over There is a curious legend in regard to me, and I was just like I used to be. I Deadman's place, Southwark, London. felt calm and happy, and I laughed after that. I jerked my gun and shoved it into his stomach. He put up his man's place, at St. Maryoverus, a man- hands and apologized. 'I will give you servant being buried at seven of the a hundred dollars now,' he said, 'if clocke in the morning, and the grave you will tell me where you got that gun.' I suppose I was a trifle quick for him."-St. Louis Post-Dispatch,

# NEW SHORT STORIES

# A Spirited Witness.

Sir Henry Irving was once the guest of honor at a lawyers' banquet in New York. In the course of a graceful address he said:

"You, gentlemen, have given me most helpful advice on the art of acting. Will you permit me to give you in return a piece of advice regarding your profession?

"My advice, then, is that you make your cross examination less rigorous, less harsh. What is the good of treating an honest and sensitive witness in the witness stand as though he were a

"I confess that I am not in sympathy with harshness in cross examination,

'DON'T YOU WANT TO HEAR WHAT I THINK ?' and whenever I hear of a witness turning on an overbearing lawyer my heart rejoices.

"My heart rejoiced last week. A young man in my company was a witness in a case of robbery. He had seen a thief snatch a young girl's pocketbook and make off.

"Well, the thief's lawyer cross examined my young friend shamefully. He roared at him, shook his fist at him, raved at him. " 'And at what hour did all this hap-

pen?' the lawyer, sneering, asked toward the end of his examination. "'I think'- my friend began, but he

was at once interrupted. "'We don't care anything here about

what you think,' said the lawyer. "'Don't you want to hear what I think? said my young friend mildly.

'Certainly not.' the lawyer roared. "'Then,' said my friend, 'I may as well step down from the box. 'I'm not a lawyer. I can't talk without think-

# Wasted Rebuke.

Mr. Gosset, the popular sergeant of the house of commons, was a genial friend of many in the press gallery. says the writer of some "Parliamentary Reminiscences," and the following story illustrates his anxiety to please: One day a lobby journalist had been very rudely treated by one of the attendants at the door of the house. "I have no time to attend to you," he had been told. "You're only a reporter,"

The journalist happened to be a man of spirit. So he went and complained to Mr. Gosset. The old sergeant flew into a great rage.

"Come along with me," he said, and, rushing down to the lobby with the journalist, he went up to the first attendant he saw and opened fire. When Sergeant Gosset opened fire nothing withstood it. The attendant cowered before a long string of forceful invective. At last the old sergeant paused and turned to the journalist.

"Will that do, Mr. --? I think I have done my best for you."

"Yes, Mr. Gosset. Thank you very much. But-but-that was the wrong man!"-London Tit-Bits.

# He Knew Its Worth.

Robert Burns was once standing on a long pier on the water front of Edinburgh, according to Tit-Bits. A well known and wealthy merchant walking by stumbled and fell into the water. He could not swim and so sank. When he arose for the third time nobody when the office worker on looking out dared to save him, but an old weather beaten sailor at the risk of his own life not see half a dozen dogs romping ran up the pier and, jumping in, res- 12.15 M. cued the man.

The gentleman had been worked over quite awhile before he became conscious, and when he realized the situation he rewarded his rescuer with what in our money would amount to 25 cents. At this the crowd which had gathered, knowing his wealth, hooted and jeered. But Burns, who was standing by, quieted them and said, "Surely the gentleman knows what his life is worth."

This is regarded as one of the best positions at the disposition of the governor, paying a salary of \$2,000 a year and \$1,500 for expenses. For four years McDermott has been an assistant janitor at the capitol. Every spare moment was devoted to a course of study, and in this way McDermott qualified for the position. ### A Mock Trial.

The vociferously heralded and profuse-Town Hall, Lexington, Tuesday evening, also bringing the number up to an audience of six hundred. The beneficiary was management consisting of Louis Armes, Warren Sherburne and George Smith for arranging the entertainment. But "the power behind the throne" was E. A. Bayley, Esq., who was the inspiration and promoter of the affair and to whom much of the success of securing the vast audience as well as the amusing presentation was due. The stage was arranged, as far as possible, to present the aspect of a court of justice, the judges and clerk appearing in wigs and gowns and a judicial and legal flavor abounded. So much was said and described in the advance notice of this trial by jury of a breach of promise case, that no explanations or descriptions are needed at this time. We were promised that there would be local hits, amusing situations and laughable episodes, and these did, in fact, abound got his full alotment of mirth and fun. and a rap here and there, that kept all alive as to what might come next. It was an exact repropuction of a court. scene in methods and procedure and on to ladies and others who had never attended a real trial. With Mr. Bayley presiding over the court, Mrs. Arthur F Turner appearing as the broken-hearted plaintiff, William M. Hatch as the defendant, Col. Newton prosecuting the case, and E. V. Newton, Esq., defending the accused, to say nothing of the brilliant array of court officers, witnesses and jurors, it is pretty certain we had all the comedy and reality of a court scene and enough wholesome fun to last a whole year.

The court first heard preliminary cases, announced by court crier Ingalls in scentorian tones, as follows: Edgar D. Parker vs. spinsters of Lexington; F. L. Emery vs. petty innholders; the Town of Lexington vs. Geo. W. Sampson; the several provision dealers of the town vs. the hungry citizens of Lexington; A. E. Horton and H. H. Putnam vs. the Lexington MINUTE-MAN; Chester Hutchinson for scorching and burning up the highways by automobile racing; J. P. Prince, Esq., vs. the society with a long name, and various complaints against Frank C. Childs, William F. Butler and Frank Peabody. The reading of the indictments and rebuttals introduced no end of personal and local hits and good-natured fun, and as the truth was rarely told, there was little occasion to take offence, even by the most "touchy," while the wise ones took cognizance of statements that were news to them and perhaps to their advantage.

The case of widow Perkins (Mrs. Turner) was next on the docket. Only a brave man would have dared cross the widow in love, for her aspect was that of a female terror, with which the meek and lady-like Willie Hatch could not be expected to successfully cope. Both impersonated their roles so that they were a delightful burlesque. Miss Taylor's keen sense of the humorous side of things and her dramatic ability in presenting a comedy role, made her part as a witness for the plaintiff one of the hits of the evening, while hardly second was Miss Gertrude Ball, the coy, yet self-sufficient and self-satisfied witness for the defence. Both were "gotten up regardless." Mr. C. E. Wheeler was a good witness, Dr. Piper abounded in professional and medi-

chapel, with Mr. Joseph M. Burtt as the passioned plea of the prosecuting attor-leader. The subject is, "Christ's life: ney could be so bitter and venimous. # Old Belfry Club.

Saturday evening, Jan. 13th, this club gave its annual "Gentlemen's Night and Smoker" in O. B. C. Hall, and had for its special guests members of George G. Meade Post 119. The hall was well filled and it was not long before the cigars disin full measure, so that every one present tributed through the hospitality of the club filled the hall with smoke and toned the masculine nerves into a happy receptive state, making them appreciative and even enthusiastic in their demonstracommittee in charge under the leadership of Prest. H. W. Porter.

The program occupied about two hours and included vocal and instrumental music with descriptive songs, all of a light, amusing and pleasing vein. An aggregation of musicians calling themselves the "Mexican Serenaders" gave the program, assisted by Geo. B. Cutter, a singer of descriptive songs accompanied by himself on the piano. Mr. Cutter's first piece was "Barbara Frietchie," which was partly recited and partly sung. It brought down the house and he had three recalls, and each was equally enjoyed by the company who highly appreciated his rather unique talents, as a singer and recitationist. For his second number he gave humorous selections that were decidedly amusing. William A. Cole, the director of the "Mexican Serenaders," appeared on the program as a banjo soloist, a mandolin player and manipulator of the "musical discs," excelling in all. The discs were a great novelty and Mr. Cole drew sweet music out of them by spinning the discs on a marble topped table, giving with perfection the old "Alice, where art Thou," and other selections. Mr. P. H Foley gave a variety with his banjo and mandola, also in vocal parts, while Sig Carlo Carciotto was the mandolin soloist playing selections from Belleni's opera "Norma," etc. Mr. Walter Vreeland played the xylophone with skill and the banjo with much sweetness and artistic finish. His own composition entitled "Love's Joy," was a charming thing for the banjo and he played it finely. It was one of the most meritable things on the program. The trick violin playing by Sig. Carciotto was a remarkable display of dexterity and originality and was warmly applauded. No numbers were better than when
